OBJECTIVE

Versatile and results-oriented Associate at Cognizant with proven expertise in developing intelligent automation and full-stack applications using .NET, Python, and Azure. Experienced in leveraging GenAI technologies—including OpenAI and Azure ML—for advanced data extraction, classification, and insight generation from unstructured sources. Skilled in building scalable, cloud-native solutions that drive operational efficiency, enhance decision-making, and deliver measurable business impact across diverse domains.

SKILL

EXPERIENCE (July 2022 - Current)

Cognizant (Project Contractual obligation Extraction)

Associate at Cognizant (Sept 24 - Current)

- Developed and deployed an automation .Net Batch job via Azure DevOps pipeline to compare critical business insights (as part of Obligation Extraction) against stored database insights, leveraging parameters to address confirmation bias.
- Utilized OpenAI's language processing capabilities for precise classification task.
- Developed and deployed a custom Python package and end-to-end Azure ML pipeline to automate the extraction of critical business insights from unstructured documents within a tight deadline.
- Engineered the pipeline with Azure Table connectivity, leveraging OpenAI's language processing capabilities and Azure Document Intelligence to accurately extract targeted information from documents with vastly different structures.
- Implemented an AKS endpoint to seamlessly integrate extracted data into a user-facing application via Azure Tables, enabling data-driven decision-making

Cognizant (Project Idea Spring)

Programmer Analyst at Cognizant (July 23 - Sept 24)

- Led critical change requests (CRs) for a pre-built, organization-wide idea management platform , resulting in significant system enhancements and structural improvements.
- Successfully delivered complex CRs involving cross-database entity linking and porting between Idea Spring and its sister application, enabling seamless data flow and enhanced functionality.

Cognizant (Project Deliver Quest)

Programmer Analyst Trainee at Cognizant (July 22 -July 23)

- Spearheaded the development of a user-centric project portfolio management application used by many organizational leads, resulting in improved project delivery timelines and increased team efficiency.
- Leveraged .NET Core and Angular to build the application from the ground up, prioritizing a seamless gamified UI/UX and robust business logic.
- Focused on delivering immersive project and client management capabilities to empower organization leads

EDUCATION

- **Bachelor of Technology in Comp. Science** (2018-2022)
- **Intermediate, CBSE** (2018)

ACHIEVEMENTS

- **Promoted to Associate** for outstanding performance in multiple projects that included Software development, R&D and Maintenance contributing to improved operational and application efficiency.
- Honored with the **Platform Warrior Award** for playing a pivotal role in a high-impact, break through GENAI project, for achieving automation of a long-standing business use case.
- Consistently recognized with the highest performance rating for two consecutive cycles.
- Volunteered with Robinhood Army, an esteemed NGO, to **empower 50+ slum kids** by educating them to ensure a brighter future.
